SEED CORN FOR NORTHERN CORN GROWERS

THE JACQUES SEED COMPANY HAS HAD 46 YEARS EXPERIENCE IN PRODUCING TOP QUALITY NORTHERN GROWN SEED CORN. FOLLOWING ARE JACQUES VARIETIES RECOMMENDED FOR THIS AREA.

802 — Developed for the northern most areas of corn production. Truly early dent type. Sturdy stalks of medium height. Easy to harvest by hand or machine. 80 days.

Med. Flats — \$12.45 per bu.

853-J — This 85 day corn has done unusually well in the state yield trials in this area. Outstanding yielder for such an early corn. Very deep kernels. Easy husking.

Med. Flats — \$12.45 per bu.

901-J — Medium height. Matures very fast. Recommended for ear corn. Early medium length. Fills out well to the tip. Deep kernels. Medium starch. Does well under dry conditions and all soil types. 86 to 88 days.

Med. Flats — \$12.45 per bu.

957-JA — Medium height. Better cold tolerance. Long slender ears with deep kernels and a small cob. Recommended for ear corn. Yields well on all soil types, has good drouth resistance. 88 to 92 days.

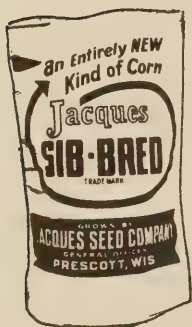

Med Flats — \$12.45 per bu.

1053-J — Rather short plants. Wide, dark green leaves. Heavy, thick ears with deep kernels. A good picker. 95 to 100 days.

Med. Flats — \$12.45 per bu.

WEATHER-PRUF — A blend for ear corn of the best hybrids for this area. Has a longer period of pollination to give some protection from hot, dry spells, yet it's uniform enough to mature evenly.

Med. Flats — \$12.45 per bu.

SIB-BRED is an entirely new kind of corn produced by a new method of breeding. Sib-bred is not a hybrid, yet it has the strong stalks and root system of good hybrids. It's a good yielder of both grain and forage, but costs only a little more than open pollinated varieties. A real improvement over open pollinated corn.

SIB-BRED No. 1 — 80 to 85 day.

SIB-BRED No. 2 — 85 to 90 day.

Choice Flats — \$7.85 per bu.

KOW SALAD, the silo corn that's blended according to a tested formula. Carefully selected, extra leafy. Jacques Hybrids of varying maturities are carefully blended in Kow Salad to give you a crop that will remain in prime condition for ensiling for a long time in the Fall. Kow Salad gives quality silage with real feed

value. You'll like Kow Salad, the perfect silo corn.

Flats — \$9.50 per bu.

It has been said . . .

J. R. McMAHON

AGRICULTURE is the BACKBONE of the NATION

and for fifty-nine years the McMahon Company has been selling to and buying from farmers and ranchers who help make up this most important industry. It is our aim to bring you the finest first in Seeds, Feeds and Agricultural Chemicals. To assure you of the best possible cleaning and treating job on your seed, we have installed the most up-to-date equipment at both Rapid City and Sturgis. We will continue to do our best to serve you well.

A WORD ABOUT FEED . . .

It seems to us that the first obligation we have toward our feeder customers is to supply them with feeds which will enable them to do a better job of feeding and increase their profits.

When we offer you Cooper Quality Guarded Feeds, we feel we are fulfilling this obligation. The good quality and efficiency of these scientifically balanced and blended feeds is evidenced by customers' reports of good results obtained economically.

The animal fat ingredient, Fatsso, which is contained in all Cooper Feeds, supplies animals with added heat energy, increases feed efficiency and palatability. You get better results with all classes of livestock and poultry when you feed Cooper Quality Guarded Feeds with Fatsso.

Here's a tip for poultry raisers — when you start your chicks this Spring, use Cooper's medicated Starter and Grower. The sulfaquinoxaline contained in Cooper Chick Feeds guards their health and gets them off to a better start.
